

Cosheston – a small nucleated village with its old core centred on a crossroads, set within attractive rolling farmland and parkland, having some of the atmosphere of a well-kept country estate, through association with the nearby Cosheston Hall to the northwest. The village had an important role in coastal trade and coal mining dating from the 16th to the 19th century. The church is a primary landmark feature. Mature trees and hedgebanks provide well defined edges to the settlement. The village lies wholly within the Milford Haven Waterway Registered Landscape of Outstanding Historic Interest in Wales.
