Square and Compass - a small linear settlement consisting of a scatter of farmsteads and houses with largely traditional built forms along the main A487 road. A fragmented settlement with more modern built form sited beyond the settlement boundary to the west, giving the impression of being a village. The National Park boundary runs along the main road, the eastern part of the settlement lying outside the National Park

| Development<br>OpportunitiesThe in-filling of open fields along the road frontage presents<br>some residential opportunity, but the potential is limited if the<br>essentially rural character of this hamlet is to remain<br>unaltered.  |       |    |                        |      |                 |  |  |   |          |  |
| Development<br>ConstraintsIn-filling some of the open fields along the northern (National<br>Park) side of the A487 road would create a more continuous<br>frontage which would not be in keeping with the sense of<br>place. This would also compromise some dramatic views out<br>from the hamlet and the road, towards the north east,<br>culminating in Strumble Head. More extensive opportunities<br>along the south side of the road outside the National Park<br>would have a similar visual effect but would not compromise<br>views of the coast.Other Notes: |       |    |                        |      |                 |  |  |   |          |  |

The capacity here is strictly limited to individual plots for residential development, otherwise the local distinctiveness would be lost and the sense of place would be altered. Its is therefore not recommended that such development should take place within the National Park along the north side of the A487road.
