Stage two evaluation

Ownership	unknown		
General overview	Small paddock with stable block. Hedgerow along eastern boundary between road and site		
Greenfield or Brownfield/PDL	Greenfield	Estimated number of dwellings	0
Adjoining uses and access	Site lies behind two residential properties, and whilst garden space bounds the western edge, both the eastern and southern edge are agricultural in use. Access would need to be achieved via the C road along the eastern edge.		
Visible constraints to development	Site is visible from field gate at the B4320 to the south of the site.		
Impact on National Park's Special Qualities	Angle is a linear settlement, with many traditional cottages, and with a magnate core at one end (including the dovecote, the church, the 'nunnery' and the tower house). Angle is an example of an Anglo – Norman planned village and sits within the Milford Haven Waterway registered Landscape of Outstanding Historic Interest in Wales. There is a distinctive local linear field pattern noticeable on the rising ground to the north and south of the main east west orientated street, which are important extant features of the characteristic medieval burgage plots. These features combine to provide a very strong sense of place and local distinctiveness, and make a significant contribution to the special qualities of the area. Development of this site would be contrary to the village character, and is likely to be harmful to the special qualities of this area.
