## Stage two evaluation

<b>Ownership</b>	84 New Road Hook		
<b>General overview</b>	Forms garden space to adjacent property		
<b>Greenfield or Brownfield/PDL</b>	Brownfield/PDL	<b>Estimated number of dwellings</b>	0
<b>Adjoining uses and access</b>	Residential development on both sides, with wooded area behind and road in front		
<b>Visible constraints to development</b>	Small site with relatively narrow access point. (site is approximately 6 metres wide at access point)		
<b>Impact on National Park's Special Qualities</b>	Hook is located within the Daugleddau LCA, the enclosed large water body provides a great sense of tranquillity here. A strong sense of enclosure and shelter is provided by the surrounding landform, dense strands of woodland and belts of trees. There is a prevailing sense of a sheltered, well cared for wooded farmland and parkland landscape of long established private estates and secluded houses contrasting with the more open shoreline villages and hamlets with views along the branches of the estuary. Hook is a linear village, lying close to the south shore of the Western Cleddau. Views out of and into the village are limited by woodland to the north and landform and mature hedgebanks to the east. The development of this site is not likely to adversely affect the special qualities of the area for this reason, particularly as it would lie within the built up area of the village.
