

## Potential site analysis for site 817, The Shop, 5 Burgage Green Road, St Ishmaels

Associated settlement     **St Ishmael's**  
LDP settlement tier       **Rural centres**  
Community Council area   **St. Ishmael's**  
Site area (hectares)       **3.02**

**Site register reference(s) (if proposed as development site for LDP)** 3322/SR116

### **Relationship to designated areas**

Not within 500 metres of a SAC.

Not within 500 metres of a SPA.

Not within 500 metres of a National Nature Reserve.

Not within 100 metres of a Local Nature Reserve.

Not within 500 metres of a Marine Nature Reserve.

Not within 100 metres of a Woodland Trust Nature Reserve.

Not within 100 metres of a Wildlife Trust Nature Reserve.

Not within 100 metres of Access Land.

Not within 100 metres of a Scheduled Ancient Monument.

Not within 50 metres of a Listed Building.

Within a Historic Landscape Area.

Within 500 metres of a Historic Garden.

Within 50 metres of Contaminated Land.

Not within airfield safeguarding zones for buildings under 15m high.

Not within HSE safeguarding zones.

Not within MoD safeguarding zones for buildings under 15m high.

Not within 10 metres of a Tree Protection Order.

Not within 100 metres of ancient or semi-natural woodland.

Underlying Agricultural Land Classification: 3 (1 is Agriculturally most valuable, 5 is least valuable).

Not within a quarry buffer zone.

Not within safeguarded route for roads or cycleways.

No Public Right of Way.

Not a Village Green.

## Stage one commentary

Site is not wholly within a Site of Special Scientific Interest; Natura 2000 site; National, Local, Marine, Woodland Trust or Wildlife Trust nature reserve; or Scheduled Ancient Monument.

Does the site pass stage one site criteria tests? **Yes**

## Stage two evaluation

**Ownership** Mr Harold Anderson and Mrs Elaine Jeffries

**General overview** This is a very large site occupying three fields to the rear of existing properties fronting the village roads.

**Greenfield or Brownfield/PDL** Greenfield **Estimated number of dwellings**

**Adjoining uses and access** The site is contained within 3 fields and are bounded by hedgebanks. The western and the western half of the southern boundary are marked by the village road which runs along the length of the site before turning through 90 degrees to the north and forming the western boundary of the site. The western two-thirds of the northern boundary is abutted by undeveloped agricultural land. The eastern third of this northern boundary abuts a residential estate. The eastern half of the southern boundary backs onto the curtilage of existing roadside properties as does the eastern boundary of the site. Access to the land is currently via a number of field gates at various points along the boundary.

**Visible constraints to development** This site is on land rising out of the village to the west. This land is exposed and prominent. Below the ridge are a surviving pattern of medieval burgage plots.

**Impact on National Park's Special Qualities** The site is on land rising out of the valley to the west and development here would be unacceptably visually intrusive. Development below this low ridge would compromise the integrity of the surviving historical field pattern of medieval burgage plots.

**Landscape impact mitigation measures**

**Affordable housing capacity assessment**

**General notes**

**Development planning history**

**Planning application history (planning applications within, overlapping or adjacent to the potential site)**

**Summary of geological risk (class A is lowest risk, class E is highest risk)**

Running sand class A; compressible ground class A; landslide class A; no soluble rocks; shrink swell class A

## Summary of flood risk (from TAN 15)

Not within a TAN 15 zone

**Public transport service** Services on school days only, summer only or less than weekly.

| Dyfed Archaeology                     | 30/05/2008       | No known archaeology but may have an impact upon a registered historic landscape. Sites with known evidence suggesting surviving significant archaeological remains. These areas require further assessment such as a desk – top exercise and site visit to clarify if any areas should be excluded from or retained within the development.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Dwr Cymru                             | 21/07/2008       | Sewerage – Within this catchment the public sewerage system is performing satisfactorily in accordance with its designed parameters and can accommodate the potential domestic foul flows from the UDP allocations already identified. To ensure the integrity of this system, we would expect the domestic surface water to be discharged to a separate system and controlled planning.<br>Where new additional allocations are promoted through the Local Development Plan, Dwr Cymru Welsh Water will assess the impact of these demands to establish if available capacity exists. Should all the proposed developments proceed at the same time then the available 'headroom' would be eroded and improvements to our systems would be required. This being the case, certain developments may need to be phased for release in the latter part of the LDP to allow us the time to deliver these essential improvements. |

Dwr Cymru 21/07/2008 Sewage Treatment - We have numerous Waste Water Treatment Works within the County which are designed to treat foul effluent from residential and commercial/industrial premises. The discharges from each of the Works are licensed by the Environment Agency to meet European Directives. Dependant on the scale of development identified within your proposed Local Development Plan the associated sewerage catchment, and may need to be upgraded as required to accommodate future growth.

Dwr Cymru 21/07/2008 Water Supply – Pembrokeshire Coast National Park is fed from strategic Water Treatment Works in the County. These water treatment works are important assets for Dwr Cymru/Welsh Water (DCWW) in delivering potable water to customers, Commercial, Health & Education premises. DCWW are developing a 25 year water resource plan to meet projected future demands for the County. Based on future demands already shared with us we do not foresee any problems at present in meeting the anticipated domestic demands during the life of the Local Development Plan. Water is a precious resource and in line with Government objectives on sustainable development we would look to promoters of developments to have considered and included where feasible, water efficient devices within buildings and sustainable drainage measures.

Environment Agency 13/07/2009 No constraints. We have serious concerns that the works would not be able to cope with additional foul flows, the Sewage treatment works may need upgrading, in this respect please contact Dwr Cymru.

**Reasons site is suitable for development**

**Reasons site is not suitable for development** Development of this site would be unacceptably visually intrusive and extend development into the countryside.

**Does the site pass stage two tests?** No **Proposed use** Housing
